

What Is Industry?

We have learned all about economy. A large part of the economy is connected to industry (just like family members are related). Remember, **industry** is the making, selling, and moving of goods, products and services.

Industry is divided into four job groups. Ready to not, here they are. There are primary, secondary, tertiary (tur' she air e), and quaternary (kwa tur' na re). We need to learn more about these types of industries because we will be referring to them later on. **Primary industries** deal with raw materials we get from our natural resources, such as farming (soil), mining (under the grounds), logging (soil) and fishing (water). **Secondary industries** deal with manufacturing, building or processing. Manufacturing needs materials from the primary jobs to produce its goods. For example, growing wheat is a primary industry. Making cereal from wheat is a secondary industry.

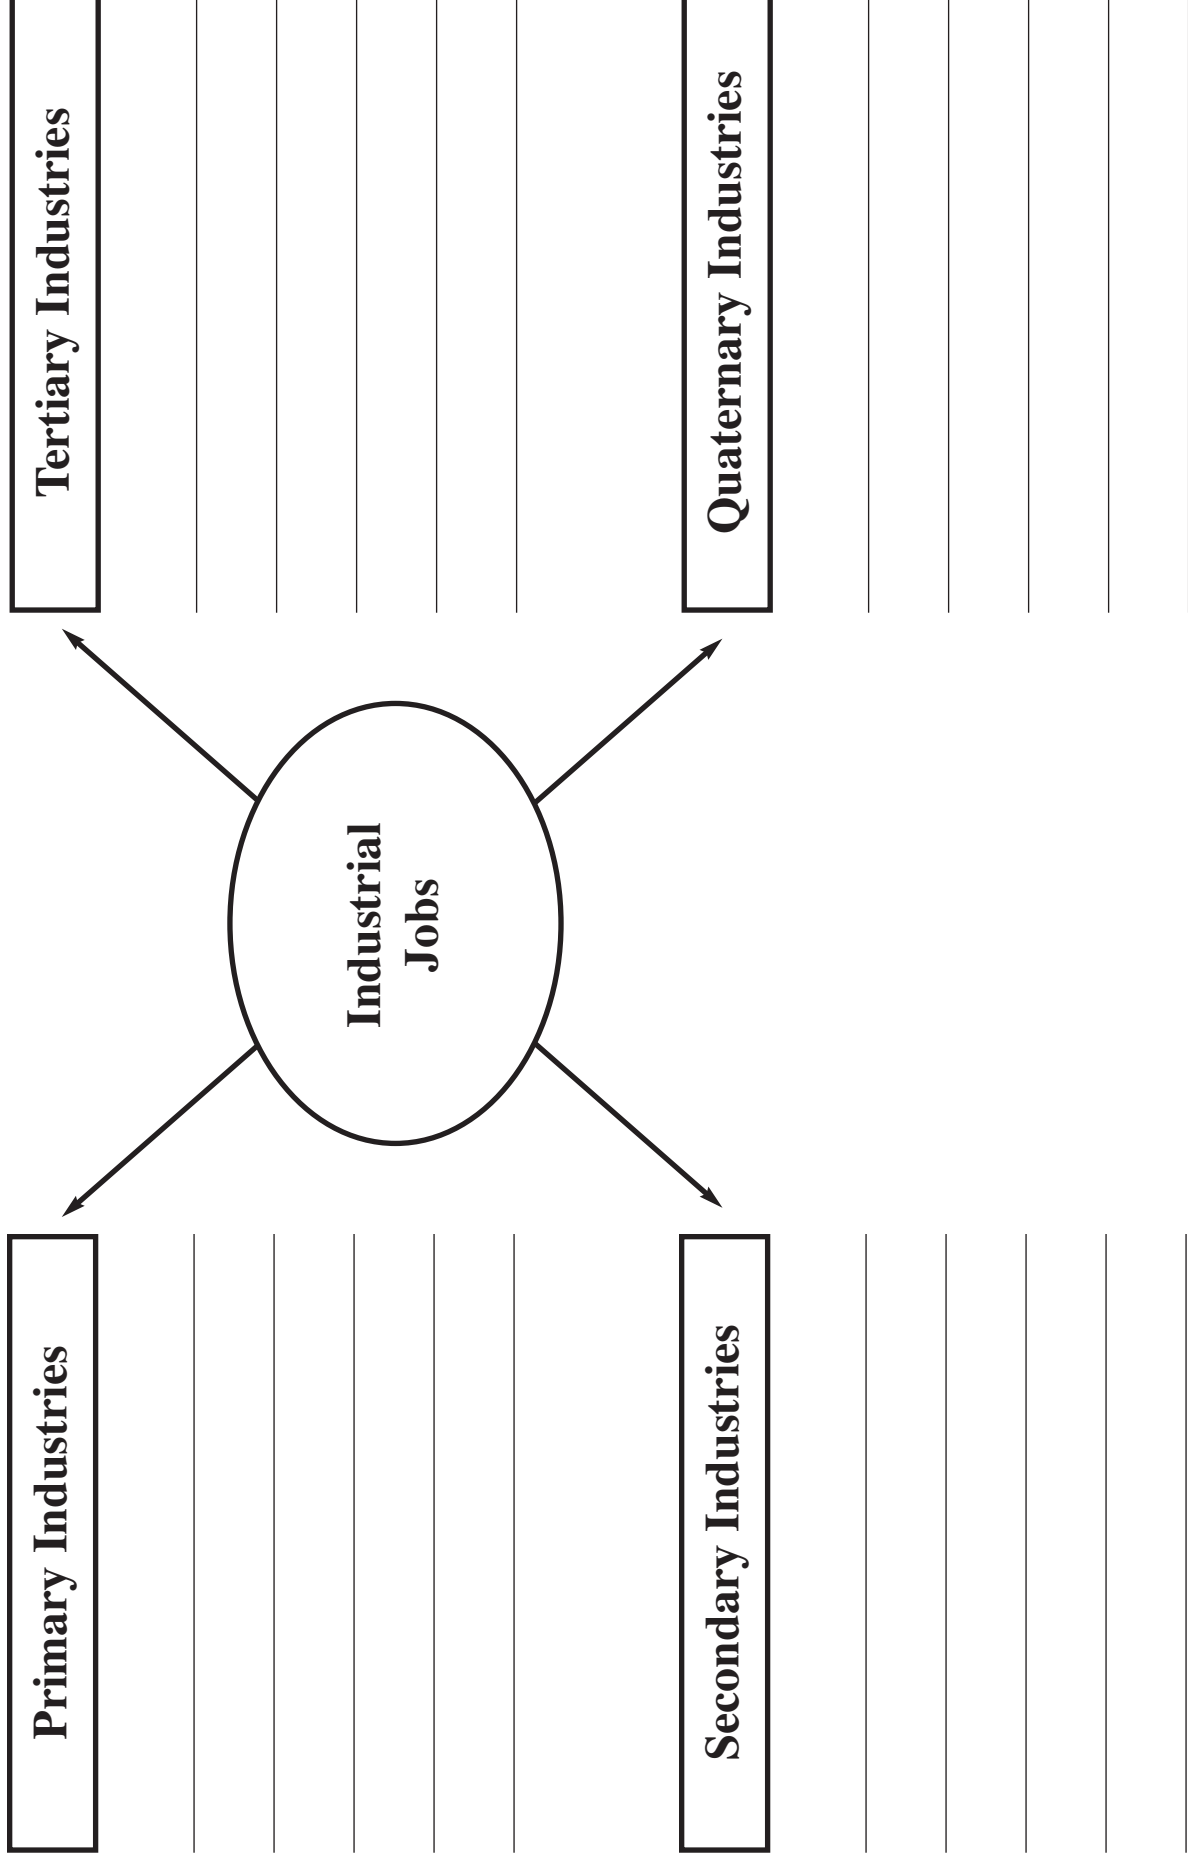

Industry in the **tertiary** area deals with services that do not require long periods of training. Examples of jobs in the tertiary area would be truck drivers, postal workers, bank tellers, and sales people. Industry in the **quaternary** area deals with services that require longer periods of special training. For example, teachers, doctors, nurses, lawyers, and architects would fall into this group.

Activity:

Using the same jobs from the Goods and Services activity on the previous page, write whether the work would be P=primary, S=secondary, T=tertiary, and Q=quaternary in the blank space. The first one is done for you.

<u>T</u> post office	_____ building airplanes	_____ making gasoline
_____ insurance	_____ lawyers	_____ mining sand
_____ selling land	_____ architects	_____ making electronic products
_____ making cell phones	_____ chemists	_____ transporting goods
_____ processing food	_____ mechanics	_____ airline pilots
_____ dentists	_____ raising blueberries	_____ unloading ships
_____ forest rangers	_____ teachers	_____ take tourists fishing
_____ making drugs	_____ selling chocolate bars	_____ flight attendants
_____ making logs	_____ campground manager	_____ harvesting clams
_____ selling clothing	_____ plumbers	_____ custodians
_____ building roads	_____ doctors	_____ raising peaches
_____ university professor	_____ computer designers	_____ making clothing
_____ processing peaches	_____ surveyors	_____ building toys
_____ building railroads	_____ motel owners	_____ building bridges
_____ restaurant owners	_____ lifeguards	_____ grocery store

Industrial Jobs Graphic Organizer

Types of Industry Frame Organizer

Use the names of **countries, regions, or states** to fill in the following types of industry frames.

Primary

--

Secondary

--

Tertiary
